INDUSTRIAL IE ENGINEERING

Indices, 1979 Volume 11

Microfilm copies of articles are available from University Microfilms International, 300 North Seeb Road, Ann Arbor, MI 48106.

Subjects (coded) and titles

0100 Costs

0101 Budgeting

Minimum revenue requirements: some extensions; G.T. Stevens Jr.; September, p. 38.

0104 Cost reduction programs

Putting together a cost improvement program; D.M. Swann; December, p. 16.

Maintenance control: it works! K.C. Achard; June, p. 34.

0105 Productivity

Closing our "productivity gap;" key to U.S. economic health; W.C. Butcher; December, p. 30.

Improve productivity through computerized memomotion; N.J. Cyr; July, p. 34.

Measure productivity from payroll records; J. Byrd Jr.; August, p. 47.

New frontier in productivity improvement: white collar workers; B.W. Cannan; December, p. 34.

Ordering system ups productivity, lowers inventory; A.A. Alonso, R.R. Fernandez; March, p. 34.

President establishes National Productivity Council; January; p. 33.

Productivity appraisal for a maintenance center; J.K. Hamlin; September, p. 41.

Productivity improvement takes hold in banking; P.N. Wilson; September, p. 25.

Productivity in shipbuilding; F.X. Munger, J.R. Helming; January, p. 25.

Quality circles: Japanese success story; S. Konz; October, p. 24.

Sorties to productivity improvement; A.T. Shukas; November, p. 38.

Wa: Personnel factor of Japanese productivity; J.L. Riggs, K.K. Seo; April, p. 32.

What about productivity improvement in the community? R.P. Peregoy, A. Alonso Jr.; May, p. 30.

0200 Employee relations

0204 Job description

Movies that make the job easier; S. Konz; November, p. 40.

0207 Wage and salary rates

1979 AIIE salary survey results; S. Langer; August, p. 52.

0300 Engineering economics

0302 Equipment replacement

Valuation, life analysis, and the IRS; T. Gonen, K. Ponder; May, p. 41.

0303 Investment analysis

Measuring machine utilization; J.D. Lorenz, A.A. Mehle; February, p. 44.

When do you hire a consultant? W.G. Lyle, D.L. Bates; June, p. 34.

0400 Facilities planning, design

0500 Functional operations

0504 Maintenance, plant engineering

Maintenance control: It works! K.C. Achard; June, p. 22.

Productivity appraisal for a maintenance center; J.L. Hamlin; September, p. 41.

0600 Human engineering

0601 Behavioral science

The art and science of delegating; J.L. Cox, D.W. Karger, R.M. Roberts; July, p. 20.

0604 Learning

Movies that make the job easier; S. Konz; November, p. 40.

0605 Motivation

Hunting band strategy—still useful; B. Hyde; February, p. 24.

Job enrichment, an overview; C.F. Bimmerle, R.R. Nelson; July, p. 28.

More than money motivates an engineer; D. Del Mar; December, p. 22.

Performance appraisal: is it worth it? V.R. Buzzotta, R.E. Lefton; January, p. 20.

Productivity slump: broader IE's needed; S.A. Birn; February, p. 38.

Quality circles: Japanese success story; S. Konz; October, p. 24.

Wa: Personnel factor of Japanese productivity; J.L. Riggs, K.K. Seo; April, p. 32.

Work improvement begins with the worker; M.M. Bakr, H.E. Rollings; September, p. 30.

0606 Personnel scheduling

Simplified scheduling of routine work hours and days off; J.J. Browne; December, p. 27.

0607 Personnel scheduling

Task test suggests male = female; J.M. Daschbach, K.L. Walker, J.C. Armstrong; March, p. 41.

0608 Safety and health

Accident: related losses make costs soar; D. Colvert; May, p. 26.

Allowances for heat stress; H. Gershoni; September, p. 20.

The case of the wrongside pitted glasses; R.W. McClure; September, p.28.

0609 Training

Design an intensive short-term training program; R.I. Leonard; August, p. 50.

Molding tomorrow's executives; B.E. Zepke; March, p. 22.

0700 Incentive plans

0800 Industrial engineering

0801 AIIE

AIIE annual report: 1978-79; July; p. 40.

American Institute of Industrial Engineers, Inc./1979-80; June, p. 40.

Atlanta—If you weren't there, you missed this; J.C. DeVore; February, p. 36.

Explain productivity locally, two ways; J.C. DeVore; January, p. 28.

Institute Officers: 1979-80; March, p. 28.

Institute promotes Productivity Improvement Week; J.F. Wolbrink; September, p. 36.

Meet the Headquarters staff; March, p. 32.

Paul D. O'Donnell, 1925-1979; May, p. 25.

Productivity Engineering Show; May, p. 37.

San Francisco—hard to beat; L.D. Miller; August, p. 55.

San Francisco—Key to the future; P.H. McGee; April, p. 36.

0802 Community service

IE advice is a community service; E.S. Argabrite, T.G. Dragovich, M.H. Eckart; June, p. 25.

What about productivity improvement in the community? R.P. Peregoy, A. Alonso Jr.; May, p. 30.

0803 Consulting
IE—the ideal interface with MIS; L. Young; November, p. 32.
President establishes National Productivity Council; January, p. 33.
Sorties to productivity improvement; A.T. Shukas; November, p. 38.
When do you hire a consultant? W.G. Lyle, D.L. Bates; June, p. 34.
0804 Education
A student looks at summer engineering jobs; M. Russell; October, p. 28.
0806 IE management
IE's prove their value in industry; October, p. 30.
A management first in Detroit; June, p. 38.
Rx for the IE manager; R.K. Sanderson; October, p. 36.
0808 General
The Institution of Production Engineers—Great Britain; J.E. Reeve; November, p. 24.
Marrying an IE can be hazardous to social life; J.H. Candido; June, p. 18.
Not everyday is the same; J.C. DeVore, P.H. McGee; November, p. 30.
0900 Industries
0901 Financial
Productivity improvement takes hold in banking; P.N. Wilson; September, p. 25.
0904 Manufacturing
ICAM—Foundation for next-generation factories; D.E. Wisnosky; April, p. 38.
Productivity in shipbuilding; F.X. Munger, J.R. Helming; January, p. 25.
0906 Others
Pollution control system increases production, saves fuel; January, p. 38.
1000 Management
1003 Decision-making
The art and science of delegating; J.L. Cox, D.W. Karger, R.M. Roberts; July, p. 20.
1004 Information systems
IE—the ideal interface with MIS; L. Young; November, p. 32.
Small computers help small operations; J.C. DeVore; April, p. 22.
1005 Management development
Molding tomorrow's executives; B.E. Zepke; March, p. 22.
1100 Material handling
Thought starters for improved handling; J.C. DeVore; August, p. 28.
1111 Storage, warehousing
How to avoid Hide-and-seek in the warehouse; P.M. Scudiere; October, p. 43.
Warehouse planning with or without a computer; K. Kumar; August, p. 42.
1113 Testing procedures
Fork failure—it can be avoided; J.R. Crosby; June, p. 40.
1114 General
How much manual handling per shipment? N.T. Balakrishnan, R. Fischer, R. Kapur; August, p. 37.
Wire rope: how to specify and maintain; January, p. 30.
1200 Methods engineering
1202 Computer control
Computer takes on MRP, savings multiply; March, p. 26.
Innovative assembly lines uses computer-controlled carriers; May, p. 44.
1203 Energy conservation
Pollution control system increases production, saves fuel; January, p. 38.
Recapturing Btu's from waste heat; B. Sternlight; February, p. 29.
Reduce waste energy with load controls; D. Foley; July, p. 23.
State energy audits—signs of progress; May, p. 46.
What will you pay for energy next year? P.F. Ostwald; January, p. 40.
1205 Manufacturing engineering
ICAM—foundation for next-generation factories; D.E. Wisnosky; April, p. 38.
1213 Work design, methods improvement
Movies that make the job easier; S. Konz; November, p. 40.
1300 Quantitative methods
1301 Mathematical models
GASP IV replaces rules-of-thumb; G.A. Crane, D.L. Thompson; May, p. 48.
Operations planning with a hand calculator; C. Carpenter; April, p. 29.
1305 Simulation/games
Avoid production delays in batching processes; November, p. 20.
Keep million-dollar machines cost effective; H.H. King, H. Bekiroglu; March, p. 39.
1400 Production and inventory control
1404 Materials management
Data system improves material management; J.P. Morgan; October, p. 41.
Modular production management system includes MRP; February, p. 28.
More than one weigh to count; H. Pasznikowicz; November, p. 46.
Ordering system ups productivity, lowers inventory; A.A. Alonso, R.R. Fernandez; March, p. 34.
1406 Production planning
Data system + layout + videotape = optimum start-up; C.D. Williams Jr.; November, p. 36.
GASP IV replaces rules-of-thumb; G.A. Crane, D.L. Thompson; May, p. 48.
Operations planning with a hand calculator; C. Carpenter; April, p. 29.
1407 Production scheduling
Optimizing schedules for custom products; R.H. Milligan, L.C. Bracker, W.E. Bracker; May, p. 32.
1500 Quality control
1600 Work measurement
1602 Computer aid
How much manual handling per shipment? N.T. Balakrishnan, R. Fischer, R. Kapur; August, p. 37.
Work sampling meets COBOL; J. Jenney, W.W. Moon; November, p. 26.
1603 Measured daywork
Let's return to MDW for incentives; M. Fein; January; p. 34.
1608 Standards development
An easier way to measure variable standards; M.D. Stevens; December, p. 38.
Generate standards information faster; F.M. ~~Gardner~~ Garver, J. Blok III; July, p. 32.
1610 Work sampling
Multiple activity work study needs X samples; D.S. Allen II; December, p. 20.
1700 Data processing systems design
1704 Information retrieval
Small computers help small operations; J.C. DeVore; April, p. 22.
1705 General
Improve productivity through computerized memomotion; N.J. Cyr; July, p. 34.

Proceedings: 1979 Spring Annual Conference

San Francisco, CA, May 22-25, 1979

Subjects (coded) and titles

0100 Costs
0102 Cost controls
A System Approach to Product Cost Tracking and Variance Analysis; John F. Langley, Thomas D. Pecora; p. 213.
0103 Cost estimating
A Multilevel Modularization Technique Designed to Minimize Life Cycle Costs for Large Systems; John E. Biegel; p. 335
Optimal Economic Selection of Highway Accident Prevention Countermeasures; Don T. Phillips, William F. McFarland; p. 25.
0104 Cost reduction programs
Contracting for Multiple Services—Cost Saver or Back Breaker; James E. Shamblin, Willis O. Whitney; p. 499.
Economic and Flow Stream Analyses of the Ames Solid Waste Recovery System; S. Keith Adams, John C. Even Jr., Petros Gheresus, Robert A. Olexsey; p. 643.
Waste Heat Recovery—A Future Source of Energy and Cost Reduction; Wayne C. Turner, Richard E. Webb; p. 623.
0105 Productivity
Aggregate Planning Models Incorporating Productivity—An Overview; Philip M. Wolfe, Behrokh Khoshnevis, M. Palmer Terrell, Riaz Monjazeb; p. 280.
Developments in Firm-Level Productivity Measurement; Jerry Hamlin; p. 194.
First Steps to Increasing Productivity: Audit that Old Incentive Plan; John L. Niles; p. 611.
A Human Approach to Motivation and Productivity—Quality Circles; Donald L. Dewar; p. 161.
Job Shop Productivity Improvement via Application of the Critical Path Method; John E. Hughes Jr.; p. 229.
Manufacturing Productivity: The Challenge for the 1980's; Keith E. McKee, Jeanette McGurk; p. 655.
Microcomputers in Industrial Engineering: A Gateway to Increased Productivity; Philip M. Wolfe, Houston B. Mount; p. 238.
MTM-C Clerical Standard Data; Robert C. Kyser Jr.; p. 423.
The Productivity Council of the Southwest; D. G. Malcolm; p. 658.
Productivity—A Function of Ability Not Disability; Don Malzahn; p. 615.
Productivity Management Reporting (P.M.R.) System; Robert J. Zamen; p. 525.
Productivity and the Roots of Stagflation: The Contribution of Industrial Engineering to Macroeconomic Well-being; Lloyd J. Durmas; p. 585.
Systematic Mine Productivity Improvement; W. J. Kennedy Jr., James E. Procarione; p. 247.
0200 Employee relations
Labor Management Cooperation in a Manufacturing Environment; Irvin Otis; p. 165.
0202 Collective bargaining
A Wage Incentive Corrective Program; R. S. Casciari; p. 468.
0300 Engineering economics
0303 Investment analysis
Dragline Sizing for Surface Coal Mines; Edward L. Mooney, David F. Gibson; p. 252.
Risk Analysis in Commercial Credit; Charles M. Parks; p. 277.
Web Press Drying; C. Clint Bolte, Stephen D. Harris; p. 145.
0400 Facilities planning, design
0404 Plant design, construction
Vertical Transportation System Study; Frank Moy Jr.; p. 575.
A Quick Reliable Method for Forecasting Bulk—Inventory Storage-Space Requirements; James A. Koenig; p. 86.
0405 Plant layout analysis
Computerized Layout and Route Design; Michael C. Boyles; p. 407.
Strategic Planning Methodologies Used to Project Process Manufacturing Resource Requirements; John O. Eckholt, Gerald E. Heppell, Delores E. Heyerdahl; p. 120.
0500 Functional operations

1979 Spring Annual Conference

0502 Clerical
MTM-C Clerical Standard Data; Robert C. Kyser Jr.; p. 423.

0600 Human engineering

0602 Biomechanics
Methods for Estimating Physical Fatigue; Arun Garg; p. 68.

0603 Ergonomics
Ability Evaluation and Job Modification for the Severely Disabled; Don Malzahn; p. 44.
The Effect of Part Proliferation on Assembly Line Operators' Decision-making Capabilities; Susanne M. Gatchell; p. 63.
Estimation of the Maximum Grasping Reach of Workers Possessing Functional Impairments of the Upper Extremities; Donald R. Smith, Lucky Arlan Goebel; p. 52.

0605 Motivation
Analysis of Factors Affecting the Turnover of Professional Personnel; Mark Evan Snyder; p. 181.
A Human Approach to Motivation and Productivity—Quality Circles; Donald L. Dewar; p. 161.

0606 Personnel scheduling
Analysis and Control of Demand Peaks at Transportation Facilties; James J. Browne, Ravinder Nanda; p. 399.
Cycle Tending Assignments Made Easy, Equitable and Profitable; George R. Deakin; p. 359.
Evolutionary Management of Government Installation Resources; Woodie R. Jenkins; p. 129.
Systematic Manpower Scheduling; Avi Raz; p. 566.
"ORDLIX" and Its Application to Japanese Industry; Takeji Kadota; p. 591.

0607 Personnel selection
Productivity—A Function of Ability Not Disability; Don Malzahn; p. 615.

0608 Safety and health
Evaluation of the Hazards of Manual Materials Handling; Gary D. Herrin, Don B. Chaffin; p. 493.
Job Design and Employee Placement in Manual Materials Handling; D. H. Liles, S. Deivanayagam, R.D. Dryden; p. 102.
Optimizing Work Station Design for Disabled Employees; Don Hommertzheim, Don Malzahn; p. 517.
Significant Control Practices Used in Industry to Reduce Potential Loss Situations; Joseph H. McGilberry; p. 37.

0700 Incentive plans

0701 Group
Coal Mining Production Incentive Systems Based on Engineering Production Standards; Richard H. Black; p. 258.

0702 Individual
First Step to Increasing Productivity: Audit That Old Incentive Plan; John L. Niles; p. 611.
Rebuilding a Deteriorated Incentive System Using a Traditional Approach; R. J. Blackmar, D. R. Englund; p. 439.
A Wage Incentive Corrective Program; R. S. Casciari; p. 468.

0800 Industrial engineering

0808 General
Total Work Design: A View Beyond the Current Industrial Engineering Boundary; J. V. Pilitsis; p. 605.
What A Plant Manager Should Expect from Industrial Engineering; S. G. Liberty; p. 601.

0900 Industries

0902 Government
Proposition 13—The Taxpayer's Revolt: How Industrial Engineers Can Save the Day; Patricia Griffith Haynes, John S. Niles; p. 170.

0905 Transportation, distribution
Computerized Layout and Route Design; Michael C. Boyes; p. 407.
Development and Implementation of a County-wide Computerized School Bus Transportation System; Donald L. Gochenour Jr., Edward L. Fisher, Jack C. Dulaney; p. 477.
Development of a Relay Dispatching System for Over-the-Road Trucking Operations; Donald B. Brown; p. 417.
Transit Performance Measures—IE Concepts Are Gaining Ground in Public Transportation; Barry J. Kaas; p. 505.

1000 Management

1007 Project management
PERT and CPM Traditional Engineering Techniques for the Human Services; David Douglas; Olan Nugent; p. 535.

1008 Controls
Productivity Management Reporting (P.M.R.) System; Robert J. Zamen; p. 252.
The Small Business Management Control System; Francisco W. Johnson, James M. Daschbach; p. 206.

1100 Material handling

1105 Dispatching, scheduling
Development and Implementation of a County-wide Computerized School Bus Transportation System; Donald L. Gochenour Jr., Edward L. Fisher, Jack C. Dulaney; p. 477.
Vertical Transportation System Study; Frank Moy Jr.; p. 575.

1107 Methods and systems design
Simulation Study of a Hospital Automated Materials Handling System; Barry T. Ross; p. 93.

1109 Principles, analysis
Physical Handling of Grocery Products from Suppliers to Retail Stores—A Systems Analysis; John C. Bouma; p. 351.

1112 Evaluation and selections
Component Selection and Operating Specifications for Belt Conveyor Systems; Jose Mario A. Tanchoco, Robert P. Davis, Richard A. Wysk, Marvin H. Agree; p. 112.

1200 Methods engineering

1203 Energy conservation
Case Histories in Energy Conservation; Neil DeKoker; p. 185.
Energy Conservation in Sewn Products Plants; James R. Ross; p. 365.
Power Factor Improvement—Better Profits and More Electrical Productivity; Wayne C. Turner; p. 79.
Use of Low Cost Microcomputers in Residential and Commercial Energy Management Systems; Barney L. Capehart, Eginhard J. Muth; p. 632.
Waste Heat Recovery—A Future Source of Energy and Cost Reduction; Wayne C. Turner, Richard E. Webb; p. 623.
Web Press Drying; C. Clint Bolte, Stephen D. Harris; p. 145.

1206 Materials conservation
Use of Computerized Models to Control Electric Furnace Scrap and Alloy Usage; W. F. DeMarco; p. 388.

1212 Waste collection, disposal
Economic and Flow Stream Analyses of the Ames Solid Waste Recovery System; S. Keith Adams, John C. Even Jr., Petros Gheresus, Robert A. Olexsey; p. 643.

1213 Work design, methods improvement
Total Work Design: A View Beyond the Current Industrial Engineering Boundary; J. V. Pilitsis; p. 605.

1214 Work analysis techniques
"ORDLIX" and Its Application to Japanese Industry; Takeji Kadota; p. 591.

1300 Quantitative methods

1301 Mathematical models
Optimal Resource Utilization in Syphilis Control; P. Balasubramanian, A. Ravindran; p. 545.
Use of Computerized Models to Control Electric Furnace Scrap and Alloy Usage; W. F. DeMarco; p. 388.

1302 Networks
PERT and CPM Traditional Engineering Techniques for the Human Services; David Douglas, Olan Nugent; p.

535.

1303 Programming: linear, nonlinear

Optimal Planning for Product/Production Facility Studies (OPPLAN); Ben F. Scribner, Don H. Berlau; p. 383.

1304 Regression analysis

Derivation and Use of Energy Consumption Standards; Dwayne A. Rollier, James E. Bailey; p. 638.

A New Approach to Regression Using Goal Programming; William H. Hill; p. 269.

1305 Simulation/games

Development of a Relay Dispatching System for Over-The-Road Trucking Operations; Donald B. Brown; p. 417.

Modeling Computer Controlled Robotic Systems for Batch Manufacturing; R. P. Sadowski, D. W. Starks, D. J. Medeiros; p. 562.

The Use of Simulation in Scheduling a Job Shop; James T. Richardson; p. 509.

Using Physical Simulators to Study Manufacturing Systems Design and Control; Shimon Y. Nof, Michael P. Deisnroth, Wilbur L. Meier; p. 219.

1307 Experimental design

Toward a Framework for Heuristic Optimization; James R. Evans; p. 284.

1400 Production and inventory control

1403 Inventory control

The Initiation and Development of an Inventory Policy; L. Ted Moore, Jack Byrd Jr.; p. 304.

1405 Production control

Bloom Shear Optimization by Computer Using Linear Array Cameras; Edmund C. Frost; p. 375.

Manufacturing Systems Planning—The Key to Production Control; Robert P. Davis, J.M.A. Tanchoco, Marvin H. Agee, Richard A. Wysk; p. 295.

1406 Production planning

Aggregate Planning Models Incorporating Productivity—An Overview; Philip M. Wolfe, Behrokh Khoshnevis, M. Palmer Terrell, Riaz Monjazeb; p. 280.

Job Shop Productivity Improvement via Application of the Critical Path Method; John E. Hughes Jr.; p. 229.

Man-Machine Charts: New Applications and Analysis; Scott T. Poage; p. 445.

A Systems Approach to Ground Beef Production for a Typical Supermarket Chain; Stephen N. Leach; p. 554.

1407 Production scheduling

Analysis and Control of Demand Peaks at Transportation Facilities; James J. Browne, Ravinder Nanda; p. 399.

Computer-Assisted Shop Loading; Ronald J. Classen, Bob Elam; p. 309.

Cycle Tending Assignments Made Easy, Equitable and Profitable; George R. Deakin; p. 359.

Job Shop Scheduling Rules Incorporating Customer Importance and Rush Status; B. M. Worrall, G. J. Bancroft, M. M. Sivanesan; p. 312.

The Use of Simulation in Scheduling a Job Shop; James T. Richardson; p. 509.

1500 Quality control

1502 Quality control

Bloom Shear Optimization by Computer Using Linear Array Cameras; Edmund C. Frost; p. 375.

Effects of Human Inspection Errors on Statistical Quality Control Plans; Alan L. Dorris, Bobbie L. Foote; p. 487.

The Optimum Design of Number of Defects Control Charts; Torky I. Sultan; p. 343.

1503 Reliability

A Multilevel Modularization Technique Designed to Minimize Life Cycle Costs for Large Systems; John E. Biegel; p. 335.

1504 Sampling

A Modern Approach to Sampling Plan Design and Evaluation; Kenneth E. Case, Lynn L. Jones; p. 325.

1600 Work measurement

1605 Predetermined time systems

Methods for Estimating Physical Fatigue; Arun Garg; p. 68.

1607 Standards auditing

The Application of Work Sampling to Short Cycling Assembly Operations; N. G. Eley, H. Villalobos; p. 429.

1608 Standards development

Measuring the Nth Job Economically; Randolph A. Eliassen; p. 460.

MTM-C Clerical Standard Data; Robert C. Kyser Jr.; p. 423.

Optimizing Product Transfers and Start-up: Utilizing the 4M Data System, Work Place Layout and Video Taping; Charles D. Williams Jr.; p. 200.

1609 Time measurement

Determination of Probabilistic Time Standards for Tasks Performed under Uncertainty; Don T. Phillips, Donald R. Smith; p. 451.

Man-Machine Charts: New Applications and Analysis; Scott T. Poage; p. 445.

1610 Work sampling

An Algorithm: The Use of Sequential Sampling in Work Measurement Audits; R. A. Bascom, G. S. Kalemkarian, J. L. Miller III; p. 3.

1700 Data processing systems design

1703 Analysis techniques

A Model of Data Production and Error Control; I. B. Turksen, V. V. Kul'ba; p. 13.

1704 Information retrieval

A Computerized Legislative Bill-tracking System; Eileen J. Phelan, Sylvia F. Heard, Richard M. Wyskida; p. 134.

Proceedings: 1979 Fall Industrial Engineering Conference

Houston, TX, November 13-16, 1979

Subjects (coded) and titles

0100 Costs

0101 Budgeting

Application of Operations Auditing in Banking; Edwin J. Summers; p. 35.

Multiobjective Capital Budgeting and Fuzzy Programming; James P. Ignizio; p. 91.

Organization of IE Departments in the Utility Industry; Gary D. Skala, Donald J. Sanders, Albert J. Hajek; p. 347.

0103 Cost estimating

Economics of Solar Energy Systems—Short Term Costing; Harold Klee; p. 418.

Materials Cost Estimating; Phillip F. Ostwald, Patrick J. Toole; p. 85.

0104 Cost reduction programs

Cost Reduction in Banking through Automation; Donald C. Vadnais; p. 26.

Profit Improvement and Cost Reduction; Leonard D. Moulder; p. 414.
The Role of Industrial Engineering in Banking; Roger C. Guarino Sr.; p. 3.

0105 Productivity
CPM Network Scheduling Applied to Engineering Substation and Transmission Projects; P. J. Beck, D. L. Stephens, E. Thomas III; p. 314.
Designing Productivity Measurement and Improvement Systems for Administrative Computing and Information Services; D. Scott Sink; p. 434.
A Dual Systems Theory for Optimizing Development Productivity; Lebert R. Alley; p. 432.
How to Increase the Engineers' Individual Productivity; Roger L. Kirkman; p. 178.
Improving Data Center Productivity with an Operations Control System; Peter F. Zoll; p. 435.
Productivity Improvement at an Electrical Equipment Repair Center; J. H. Davis, J. D. Erwin, R. W. Schomber; p. 289.
Reducing Conflict and Increasing Productivity in the Operations Area; Manfred L. Spengler; p. 157.
Total Factor Productivity—A New Corporate Performance Measurement Technique; Jerry L. Hamlin; p. 294.
Work/Activity Sampling—Contemporary Design, Analysis Methodology and Applications; Joseph J. Moder; p. 367.

0106 Accounting
Bank Cost Accounting System Design; K. A. Lifson; p. 8.

0200 Employee relations

0201 Arbitration
New and Future Labor Arbitration Issues in the Private Sector; Lavada A. Adams, M. J. Fox; p. 190.

0205 Job evaluation
Work Standards for Increased Productivity—Union-Management Cooperation; Irvin Otis; p. 160.

0300 Engineering economics

0301 Cash flow analysis
The Long-term Effectiveness of Expected Net Present Value Maximization; R. V. Oakford, Arturo Salazar, H. A. DiGiulio; p. 71.

0303 Investment analysis
Economic Analysis of Energy Proposals; W. C. Turner, K. E. Case; p. 47.
Economics of Pipe Sizing; Byron D. Smith; p. 421.
New Methods for the Economic Evaluation of Capacity Expansion in Electric Utilities; J. C. Ammons, L. F. McGinnis, F. A. Ramirez, G. J. Thuesen; p. 95.

0304 General
Economics Analysis of Projects under Uncertainty Conditions; Umesh Saxena, Joseph A. Svestka; p. 420.
Engineering Economy Studies in an Inflationary Environment; William G. Sullivan, James A. Bontadelli; p. 101.

0400 Facilities planning, design

0402 Facility location
Maximum Single Facility Location Problem; Thomas P. Cullinane, Gilberto Moreno Jr.; p. 113.

0405 Plant layout analysis
The Make-or-Buy Feasibility Study, a Detailed Case History; George Vasiliou; p. 425.

0408 Plant maintenance
Planning, Scheduling and Controlling Maintenance Activities in Gas Transmission Lines; Merle N. Mielke, Jr.; p. 332.
Transmission and Distribution Maintenance Management Survey; Robert J. Frantzen; p. 320.

0500 Functional operations

0600 Human engineering

0601 Behavioral science
Using MCD-MOD-1 to Measure and Control Office Costs; Harold W. Nance, Robert L. Kreighbaum; p. 361.

0603 Ergonomics
Anthropometry and Computer-aided Crew Station Design; James L. Lewis; p. 170.
Dynamic Anthropometry; William E. Thornton; p. 163.
NASA Anthropometric Source Book—A Review; John T. Jackson; p. 175.

0604 Learning
To Determine the Optimum Number of Setups to Produce a Finite Quantity under the Influence of Learning and Forgetting; D. R. Sule; p. 431.
Using Learning Curves in Integration of Production Resources; Ravinder Nanda; p. 376.

0610 Sociological factors
Quality of Working Life: A New Approach to an Industrial Society; Dawn E. Hummel; p. 182.

0700 Incentive plans

0800 Industrial engineering

0806 IE management
Organization of IE Departments in the Utility Industry; Gary D. Skala, Donald J. Sanders, Albert J. Hajek; p. 347.

0808 General
Implementing Change in the Retail Industry; Stephen N. Leach; p. 275.
Industrial Engineering—The Crisis and the Challenge; Kjell B. Zandin; p. 416.

0900 Industries

0901 Financial
Bank Cost Accounting System Design; K. A. Lifson; p. 8.
Forecasting, Planning, and Control for Bank Operations; Vincent A. Mabert; p. 21.
The Role of Industrial Engineering in Banking; Roger C. Guarino Sr.; p. 3.
Workshop to Develop Information Exchange; Leslie J. Singer; p. 41.

0902 Government
Saving Tax Dollars in Public Buildings—Case Studies in Florida; Robert D. Doering, Ronald D. Evans, Yasser A. Hosni; p. 55.

0903 Health care and other services
Application of Industrial Engineering to Hospital Outpatient Services; Terry J. Donofrio, Elayne Landis, Herbert I. Zagor; p. 413.

0905 Transportation, distribution
Everything Distribution Wanted to Know about Marketing but Was Afraid to Ask; Robert E. Sabath; p. 279.

0906 Others
Potentials for Research and Research Needs in the Food Industry; Richard A. Edwards; p. 273.

1000 Management

1004 Information systems
Understanding Microprocessors for Executives and Management Personnel—A Tutorial; Gene H. Miller; p. 219.
Using Standardization of Management Information Systems Methodology as a Vehicle to Project Management; Larry E. Long; p. 443.

1006 Organization
Professional Personnel Measurement and Staffing; Bob Morehead, Don W. Myers; p. 352.

1007 Project management
Designing an Optimal PERT Network: Precedence Relationships for a Desired Project Duration; Jay Satia, Surendra Mohan Gupta; p. 436.

1100 Material handling

1106 Industrial trucks
Dynamic Guidelines for Managing Your Forklift Truck Fleet; James A. Koenig; p. 422.
There's Gold in the Fork Truck Fleet; John L. Niles; p. 423.

1107 Methods and systems design
Application of Simulations to Order-picking Planning and Design; Edward B. Quinn, Theodore A. Norman; p.

126.
Economic Unit Loads and Its Impact on Material Flow Systems Planning; Jose M. A. Tanchoco, Richard A. Wysk, Robert P. Davis, Marvin H. Agee, p. 141.
The Importance of Good Functional Specifications; Charlie Verboom, Ron Tepper; p. 445.
A Rational Approach to the Design of Pneumatic Materials Handling Systems; Natu Patel, F. H. Reardon; p. 424.
The Smart Factory; Keith E. McKee, Janis Church; p. 148.

1111 Storage, warehousing
A Warehouse Management System; Jim Sena, Ron Johnson; p. 444.

1200 Methods engineering

1201 Automation, mechanization
Group Technology, the Multi-billion Dollar Revolution, Its Benefits and Cost Savings; Alexander Houtzeel; p. 197.
Industrial Robots—A Users Viewpoint; Vernon E. Estes; p. 202.
Integrating Robots into a Machining System; John G. Holmes; p. 241.

1202 Computer control
Computerized Systems in the Scheme of Things; M. M. Barash; p. 239.
Interfacing the MMD-1 to a Traffic Light Simulator; Ronald J. Classen, Roger W. Berger; p. 395.
The Machine Tool/Microprocessor Interface; John E. Biegel; p. 404.
Microcomputer-based Process Control; Philip M. Wolfe, Mark T. Yokley; p. 399.
Problems in the Installation and Use of Numerical Control; Cliff Marshall, Mikell P. Groover; p. 209.
System Design and Software for a Discrete Control Training Device; Roger W. Berger, Ronald J. Classen; p. 389.

1203 Energy conservation
An Energy Management Program for Public Schools; J. Douglas Machesney, Joseph Gansor, Donald L. Gochenour Jr., Emil Steinhardt; p. 60.
Energy Management Systems in State Buildings in Florida; R. D. Doering; p. 417.
An Energy Management Training Study; Richard E. Webb; p. 419.
Energy Use in a Hospital; F. R. S. Dressler; p. 67.
Saving Tax Dollars in Public Buildings—Case Studies in Florida; Robert D. Doering, Ronald D. Evans, Yasser A. Hosni; p. 55.

1205 Manufacturing engineering
Integrating the Computer into the Material Flow System; David L. Kelly; p. 135.

1213 Work design, methods improvement
Work Simplification in Banking; Ben DiSylvester; p. 15.

1300 Quantitative methods

1301 Mathematical models
Operations Analysis and Modeling through Underground Time Study Techniques; William J. Douglas, Robert A. Pimentel; p. 227.

1303 Programming: linear, nonlinear
Modelling a Complex Non-linear System through a Simple Heuristic Approach; Chia-hao Chang, Onur M. Ulgen; p. 442.

1305 Simulation/games
Application of Simulations to Order-picking Planning and Design; Edward B. Quinn, Theodore A. Norman; p. 126.
Automated Production Line Analysis and Design Using Simulation; Ronald F. Perry; p. 439.
A Computer Model for Determining the Cost of a Wage/Salary Program; W. R. Hutsell, S. L. Quisenberry; p. 437.
Finding the Optimal Algorithm via Simulation; L. E. Shar, T. F. Daugherty; p. 440.
How Simulation Methodology, rather Than Ackoff's Method, Permits a Proper Merger of IE, OR, and MS; G. Arthur Mihram; p. 438.
Problem Solving Using Simulation; Robert E. Shannon; p. 259.
Simulation Modeling; Joe J. Mize; p. 265.

1400 Production and inventory control

1404 Materials management
An Integrated Approach to Management of Material Flow System; Rodney J. Heisterberg; p. 118.
Integrating the Computer into the Material Flow System; David L. Kelly; p. 135.
Productivity Improvement at an Electrical Equipment Repair Center; J. H. Davis, J. D. Erwin, R. W. Schomber; p. 289.
Significant Cost Savings in Materials Management; F. N. Swendeman, A. Alonso; p. 339.

1406 Production planning
Forecasting, Planning, and Control for Bank Operations; Vincent A. Mabert; p. 21.
On the Gap between Theory and Practice of Production Planning Systems; Geramine H. Saad; p. 430.
Group Technology, the Multi-billion Dollar Revolution Its Benefits and Costs Savings; Alexander Houtzeel; p. 197.
An Implementation Study of the OWATT Algorithm for an Unbalanced Production Line; B. L. Foote; p. 429.
Planning and Control System for Transmission Line Construction Activities; David H. Gentry; p. 305.
Planning for Yield Improvement; Shlomo Vilozny; p. 428.
Using Learning Curves in Integration of Production Resources; Ravinder Nanda; p. 376.

1407 Production scheduling
CPM Network Scheduling Applied to Engineering Substation and Transmission Projects; P. J. Beck; D. L. Stephens, E. Thomas III; p. 314.

1500 Quality control

1501 Inspection
A Microprocessor-based Inspection Machine Incorporating a Robot with Vision; Norm Mavis; p. 222.

1502 Quality control
Quality Control in Banking; Antonio Riera; p. 427.

1600 Work measurement

1606 Standard data
Department of Defense "Engineered Performance Standards—A Contemporary Work Measurement Tool for Evaluating and Establishing Efficiency in Maintenance Work; W. David Gambrel; p. 426.
Performance Standards in Development of Computer Projects; Y. Hosni, D. Linton; p. 433.
Using Learning Curves in Integration of Production Resources; Ravinder Nada; p. 376.

1609 Time measurement
Operations Analysis and Modeling through Underground Time Study Techniques; William J. Douglas, Robert A. Pimentel; p. 227.
Performance Measurement of Customer Service Personnel; Robert B. Graham; p. 297.
Work/Activity Sampling-Contemporary Design Analysis Methodology and Applications: Part II—Work Sampling Calculations, Revisted; Elinor S. Pape; p. 371.

1611 General
Using MCD-MOD-1 to Measure and Control Office Costs; Harold W. Nance, Robert L. Kreighbaum; p. 361.

1700 Data processing systems design

1705 General
Interfacing the MMD-1 to a Traffic Light Simulator; Ronald J. Classen, Roger W. Berger; p. 395.
System Design and Software for a Discrete Control Training Device; Roger W. Berger, Ronald J. Classen; p. 389.

IE
